

APL *INDIALINX*™ – Your first choice for intermodal rail service.

APL *INDIALINX*™ APL has a long history as an innovator in the Indian market. In fact, we introduced containerization to India in 1973. Today, we continue to break new ground with the launch of APL *INDIALINX*™ – a container freight rail service that offers India-based and international customers more delivery certainty and supply chain control.

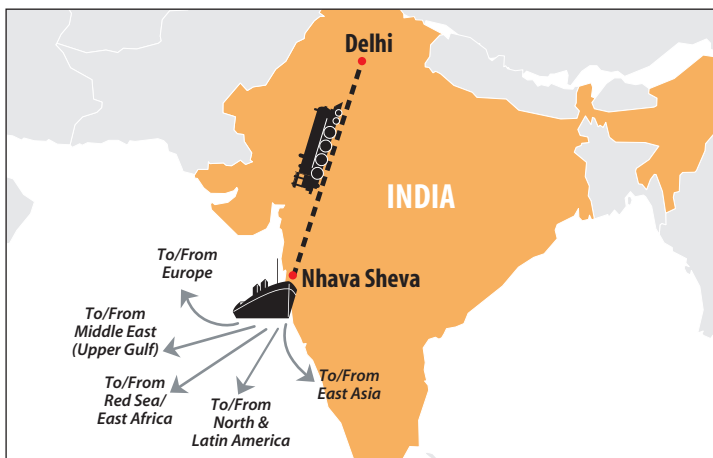

The *INDIALINX*™ Advantage

► Faster inland transit

APL *INDIALINX*™ will provide the fastest possible access to Northern India’s hinterland, significantly reducing the transit time for moving cargo to and from India’s inland container depots (ICDs). The first train will run between ICD Loni near Delhi and Jawaharlal Nehru port at Nhava Sheva. As more trains are introduced to the service, APL *INDIALINX*™ will expand its coverage to other parts of India.

► Reliable and time-definite

At APL, we know that timely delivery of cargo is critical to your business. So we are committed to minimizing the choke points that could hamper your supply chain, and provide the most reliable and efficient rail transportation to meet your just-in-time supply chain needs.

► Synchronized ship and train schedules

Our reliable rail schedules allow you to plan your shipments in advance. Rail departures are coordinated with ship arrivals and cargo priorities to ensure that trains are loaded rapidly, thereby increasing shipment speed and reliability.

APL *INDIALINX*™ – Your first choice for intermodal rail service.

The IndiaLinX™ Advantage

▶ First and last mile connectivity

For your added convenience, we have trucking solutions to facilitate the movement of your cargo to and from ICDs.

▶ State-of-the-art IT solutions

You can have quick and easy access to train schedules and resources you need at **www.aplindialinx.com**. With state-of-the-art online booking and tracking tools, you can have greater control over your shipments.

▶ APL – the trusted name in global transportation

Backed by APL's renowned reliability and intermodal expertise, you can rely on *INDIALINX* to provide the best-in-class intermodal rail service to meet the needs of India's fast-growing import and export trades.

▶ One company coordinating inland and ocean transportation

Having APL to coordinate your shipment from origin to destination means minimal hand-offs, an integrated and seamless service and more supply chain control.
